World-Class Driller Visualizes Future

In order to do the business of drilling in the field at its world-class best, a U.S.-based upstream Oil & Gas leader wanted a more expedient means of displaying productive business data on-screen, including specific use-cases: HR personnel accounting with SAP SuccessFactors and Fieldglass. Their needs were met using SAC, brought to life in an accelerated fashion, by specialized SAP consultants from Sierra Digital.

Sierra helps O&G leader find its TrueNorth

“With the help of Sierra Digital, all our SAP systems can have a direct connection with SAC,” according to the IT Director of a leading upstream drilling company.

“This really streamlines the business process of data retrieval and display when compared to other non-native BI tools.”

As part of the TrueNorth Solution package, Sierra consultants quickly established a direct connection with SAC to most SAP products in order to model, display, correlate, and link productive data from a variety of data systems to achieve a complete holistic view of business workflows.

Key Project Benefits

- Quick and easy data source connection set-up to native SAP systems, both in-the-cloud and on-premise.
- Gleaned relevant and insightful information stacked into a simple, clean interface.
- Fully customized story pages tell the business success story, as well as locate business process obstacles early on to keep success momentum going.
