

BECAUSE YOUR WORLD-CLASS ENTERPRISE DESERVES AN AR/AP COMMUNICATION SYSTEM TO MATCH

Sophisticated technology drives so much of your business. Why then, does AR/AP rely on a game of telephone to manage thousands of transactions per week?

At Sierra, SAP's Automation Innovation Station, we're pioneering a centralized hub that helps finance folks interact with SAP systems and their customer/stakeholders simply, completely, and in real-time. We call it OhZone^{APRA}. You'll call it your favorite new toy.

With OhZone^{APRA} in hand, you'll soon say goodbye to:

- Back and forth emails
- Payment delays
- Manual collection processes which result in duplicate efforts, duplicate cases, and data errors
- Lack of accountability
- Manual clearance posting in S/4 HANA
- Underutilization of valued time and money

The AR/AP Communications Integration App of The Future

OhZone is a SaaS-based application synched entirely to your back-end SAP systems, software ecosystem, and contact groups. Available anytime, anywhere, on any device, the app is engineered by and for AR/AP pros to offer a slate of productivity advancements, including:

- Account assignments (individual and group)
- Email notification automation based on user-defined thresholds
- Real-time reporting with live comment capability
- Ability to assign at the transaction level from one individual to another and have the ability for the user to filter on their name so they can work their transactions and update comments
- Drill-down capabilities to S/4 transaction-level details
- Streamlined follow-up on outstanding items
- Real-time review and resolution of outstanding aged items.

Take the game of telephone to your next family reunion. Meantime, give us a call and find out how simple, quick, and efficient it is to achieve total AR/AP Communications Integration.
