

BTP-BASED CAPITAL PROJECT OPTIMIZATION

Automate and optimize comprehensive Capital Project Builds while on the go, saving you valuable time and money, reducing risk, and assuring successful outcomes. Cloud-based OhZone^{CPB} is a 360° project builder with specialized capital project workflow modules that help you frame, build out, and best manage core processes anywhere:

Because OhZone maps seamlessly to your existing productivity ecosystem via SAP Business Technology Platform (BTP), it facilitates plug-and-play access to the communications, project, and document systems you now use. Using feeds from them, OhZone automates key processes, plus delivers roll-ups of integrated data & analytics in

intuitive, mobile-friendly screen flows. The application allows extensive workflow customization atop a full array of templates. Or, quickly construct your own workflows and dashboards with drag-and-drop ease. From planning, to construction, to handover, OhZone^{CPB} works the way you want, and facilitates seamless collaboration with third parties.

- ▶ Eliminate virtually any paper-based process with OhZone's built-in Document Management System. It facilitates mark-ups and approvals on AutoCad, images, PDFs, MS Office docs, and more.
- ▶ Simply import project plans from Primavera, Excel, and Microsoft. OhZone enables real-time access to your entire productivity ecosystem with unlimited capacity to manage and control assets on the go.
