

ESG+

MAKE GREEN FROM GOING GREEN

Isn't it time you flipped the script on ESG, from cost center to value generator?

Think about it: Climate, Equality, and Covid all train an ever-brightening spotlight on Enterprise Environmental, Social & Governance responsibilities. Done right, your entire ESG programming and reporting functions can convince an array of stakeholders—from the boardroom to the lunchroom—of your company's growing worth.

From Tiny Acorns, Tall Oaks Grow

OhZone rides atop your existing ESG Process and Workflow Stack to plus your every effort, with:

- Flexible, proprietary APIs to set definitions and protocols that result in total ESG system/process integration.
- The power to tap into Analytics & Visualization Engines whereby you can Align, Perform, Report, and Prove Value to your top and bottom lines.
- A comfortable, compact, productivity-optimizing User Experience that jettisons all the stuff you don't need in favor of the best-practice templates and KPIs you do.
- Secure permissioned accessibility, allowing your ESG staff to contribute anywhere, anytime, on any device.
- Speedy implementation, effortless adoption, and risk-free confidence—because API technology assures that contributing system changes are fully embraced.

- + ALIGNMENT**
