OPTIMIZE PROJECT PORTFOLIO INVESTMENTS ANYWHERE

Intuitive, customizable dashboards facilitate integrated management of business goals, financials, and project selection & performance. All in real time from anywhere.

OhZone[PPM] offers a full-scale Project Portfolio Management experience for IT & Business Leaders, featuring a cloud-based, AI-enhanced Portfolio Planning Process. The application enables the selection of projects that optimize portfolio investments at the enterprise level, and it facilitates their sustainable, value-driven management.

Architected according to the Project Portfolio Management Best Practice Framework published by the Project Management Institute (pmi.org), OhZone[PPM] seamlessly integrates strategic planning with resources, project processes, and financials.

Key Application Features

- Automated Ideation Process identifies and categorizes ideas for strategic, optimization, and regulatory initiatives with management input and buy-in.
- Evaluation & Prioritization Processes score business cases based on alignment with Business and IT strategies and value, plus cost and complexity.
- Financial Tools/Processes assures projects are reconciled to resources and key business question are answered.
- Application Landscape Rationalization functionality helps you match the right technology to project and strategic goals.
- Holistic Risk Profiling evaluates risk versus return for the entire portfolio, rather than weighing individual project risks.
