# MANAGE PROJECTS ANYWHERE

Intuitive, customizable dashboards highlight hotspots of focus, opportunity and concern. With just a few clicks, you'll manage and optimize your total project assets, and every component thereof. All from anywhere.

Automated Project Management using SAP Business Technology Platform

Leveraging the power of SAP's Business Technology Platform (BTP), everyone in your Project Management Organization (PMO) can overcome long-standing barriers to project success:

40% of projects do not complete on time

<50% of projects experience scope creep

~45% of projects do not complete within budget

With OhZone^RPM, a cloud-based, AI-enhanced app, you and your entire PM staff will actively contribute to business growth and profitability through outstanding remote project experience management.

Key Application Features

- See new opportunities to enhance project outcomes, shrink costs, and improve customer satisfaction.
- Select Executive, Finance, Operations, and Resource views to facilitate instant drill-down.
- Quickly build custom dashboards to reference Strategy, Prioritization, and Gap Analyses.
- Manage time, cost, scope, and risks through predictive and prescriptive analytics.
